PHASES

1

Accumulate Bitcoin

ABC is aiming to raise N\$ 200M, starting with N\$ 11M on the 8th September 2025, to acquire early Bitcoin reserves into a listed, regulated treasury vehicle.

2

Launch Bitcoin Products

ABC will issue listed preference shares and structured notes offering capital protection and leveraged upside to raise larger institutional capital and grow its Bitcoin holdings.

3

Global Listings

Africa Bitcoin Corporation will pursue secondary listings across Africa and globally to expand investor access to Bitcoin exposure.

Africa Bitcoin Corporation Limited (the Company) holds a proportion of its treasury reserves and surplus cash in Bitcoin. Bitcoin is a type of cryptocurrency or crypto asset. Whilst the Board of Directors of the Company considers holding Bitcoin to be in the best interests of the Company, the Board remains aware that the FCA considers investment in Bitcoin to be high risk. At the outset, it is important to note that an investment in the Company is not an investment in Bitcoin, either directly or by proxy. However, the Board of Directors of the Company consider Bitcoin to be an appropriate store of value and growth for the Company's reserves and, accordingly, the Company is materially exposed to Bitcoin.

The Company is neither authorised nor regulated by the FCA. And cryptocurrencies (such as Bitcoin) are unregulated in the UK. The value of Bitcoin can go down as well as up, and therefore the value of the Company's Bitcoin holdings can fluctuate. The Company may not be able to realise its Bitcoin exposure for the same as it paid in the first place or even for the value the Company ascribes to its Bitcoin positions due to these market movements.

Nevertheless, the Board of Directors of the Company has taken the decision to invest in Bitcoin, and in doing so is mindful of the special risks Bitcoin presents to the Company's financial position. These risks include (but are not limited to): (i) the value of Bitcoin can be highly volatile, with value dropping as quickly as it can rise. Investors in Bitcoin must be prepared to lose all money invested in Bitcoin; (ii) the Bitcoin market is largely unregulated. There is a risk of losing money due to risks such as cyber-attacks, financial crime and counterparty failure; (iii) the Company may not be able to sell its Bitcoin at will. The ability to sell Bitcoin depends on various factors, including the supply and demand in the market at the relevant time. Operational failings such as technology outages, cyber-attacks and comingling of funds could cause unwanted delay; and (iv) cryptoassets are characterised in some quarters by high degrees of fraud, money laundering and financial crime. In addition, there is a perception in some quarters that cyber-attacks are prominent which can lead to theft of holdings or ransom demands. The Board of Directors of the Company does not subscribe to such a negative view, especially in relation to Bitcoin. However, prospective investors in the Company are encouraged to do your own research before investing.
